|---|---|

1. Describe in your own words the experiences you have had in this course (*describing*).
  - \* What have I learned during previous seminars/meetings and independent work?
  - \* What have I learned or got to know?
2. Recall and analyse your feelings, emotions and reactions during this course (*evaluation*).
  - \* What does this experience mean to me personally and professionally?
  - \* How does this experience affect me and my thinking in a professional sense?
3. Relate the experiences of this course to previous experiences and find opportunities for practical application (*relationship*).
  - \* What did I think about big data and data analytics before and what do I think now?
  - \* Has the experience gained changed my thinking? How?
4. What have I personally contributed or done to make this course a success? What could I do more? What have I learned? What have I learned about myself in this situation?
5. How have other students contributed to the success of this course? What has prevented the successful implementation of the course? What would have contributed to the successful realisation of the course?
