

LIVING LAB CAN MAKE INNOVATIONS WORK IN REALITY!

A Living Lab is your tool if you are:

A state or local authority **decision-maker** whose task is to develop smarter public services

An academic who would like to know if new knowledge can be commercialised as a product or service

A Client who should like to participate in product or service development

An Entrepreneur who would like to develop a product or service

TALLINN UNIVERSITY

Living Labs is a laboratory for experiments in the real world

We offer:

ideas and services development

validation of solutions with all stakeholders

testing in a live customer environment

feedback and insight into your solution or service from industry experts

networking with local researchers, entrepreneurs, end-users, public sector stakeholders and other international living labs
